Press release 16.4.2013

## TANGO – at Design Museum's Gallery 26 April -26 May 2013

This collaborative project of the Aalto University School of Arts, Design and Architecture, L'École de design Nantes Atlantique and the Politecnico di Milano offers tools to participation, and for studying the ways in which design can improve the everyday lives of people. The exhibition will come directly to Finland from Milan at the end of April.

This project involving students of art and design in three countries also led to an exhibition, which is deepening our understanding of how the phenomena of everyday life are culturally determined. It is also arousing interest in the role of different approaches to design, and of art and art education in design process. Overall the exhibition reminds us how important it is to listen to people in towns and suburbs. The exhibition includes a range of accompanying events, including workshops. Further information will be updated during the spring in the calendar of events.
